

STOP

Invasive Aquatic Mussels

Quagga Mussel

Zebra Mussel

Unwanted plants and animals can ruin our favorite fishing and boating waters.

- Remove any visible mud, plants, fish or animals.
- Drain water from your boat, trailer, tackle and gear *before* leaving the area.
- Clean and dry anything that came in contact with water (boats, trailers, equipment, clothing)
- Never release plants, fish or animals into a body of water unless they came out of that body of water
- Consider more aggressive cleaning of your boat if it has been at a lake with known nuisance species.

UPDATE (January 2007): Harmful quagga mussels have been found in Lake Mead and Lake Havasu. Take appropriate steps to prevent aquatic hitchhikers.
