

THE COSTS OF INSPECTIONS

Effective October 1st 2011

Since 2007, Diamond Valley Marina has cooperated with Metropolitan in the effort to keep the waters of Diamond Valley Lake open to the boating public while protecting against the threat of an infestation by Aquatic Invasive Species (AIS). This cost of this dedicated service includes personnel and documentation required to manage the program. The cost of providing inspection services is now the responsibility of Urban Park Concessionaires.

The district effective October 1st is no longer underwriting the costs of inspections.

Districts in Northern California have implemented fees for inspections and fees for banding are as high as \$50.00 for a lock and tag system in Southern California. The \$3 per boat banding is in effort to help recover some of inspection costs. The banding service is simply a convenience offered by the Concessionaire. It is not required and does not keep the boater from re-entering Diamond Valley Lake.

The vessel upon re-entering is subject to a full inspection and must be presented "CLEAN, DRAINED, and DRY."
